

3. OUTLINE OF CALCULATIONS

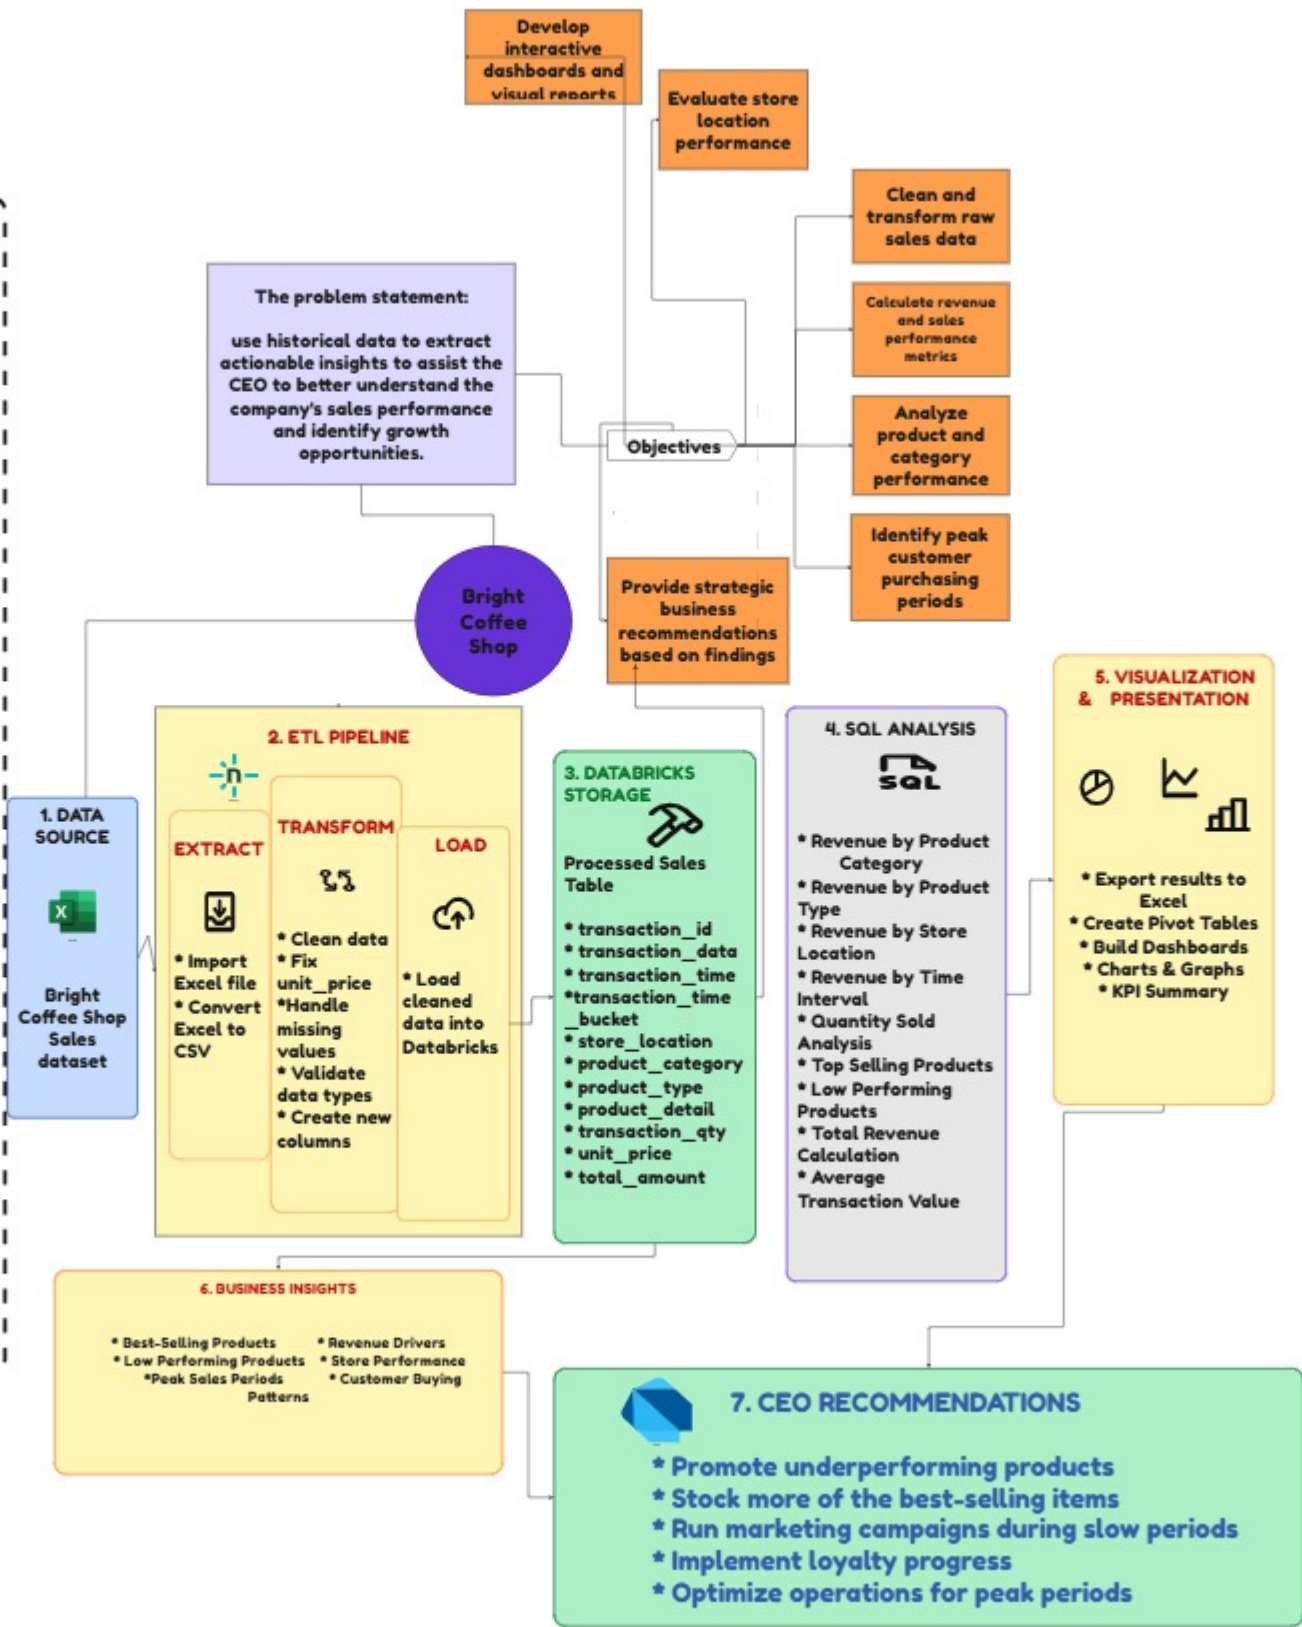

TOTAL AMOUNT
 $\text{total_amount} = \text{unit_price} \times \text{transaction_qty}$

TOTAL REVENUE
 $\text{Total Revenue} = \text{SUM}(\text{total_amount})$

TOTAL UNIT SOLD
 $\text{Total Units Sold} = \text{SUM}(\text{transaction_qty})$

AVERAGE TRANSACTION VALUE
 $\text{Avg Transaction Value} = \text{Total Revenue} / \text{Total Transactions}$

TIME BUDGET GROUPING
 Group transactions into 30-minute intervals or 3-hour intervals to analyze peak times

2. KEY INSIGHTS TO DELIVER

- Sales by Product Category
- Sales by Product Type / Detail
- Sales by Time Intervals
- Revenue by Store Location
- High-Performing Products
- Low-Performing Products
- Total Revenue Calculations
- Total Units Sold
